Introduction

Vertex Group is a professional engineering firm founded in 2008 and located in Tripoli, North Lebanon. It has a variety of services in design, detailed shop drawing and contracting experience. VG is a multi-disciplinary company that provides comprehensive services from concept to construction. We offer our clients a variety of services to deliver projects in high standards in **Design, Architectural draft drawings, Structural draft drawings, 3D rendering, animation and Contracting.**

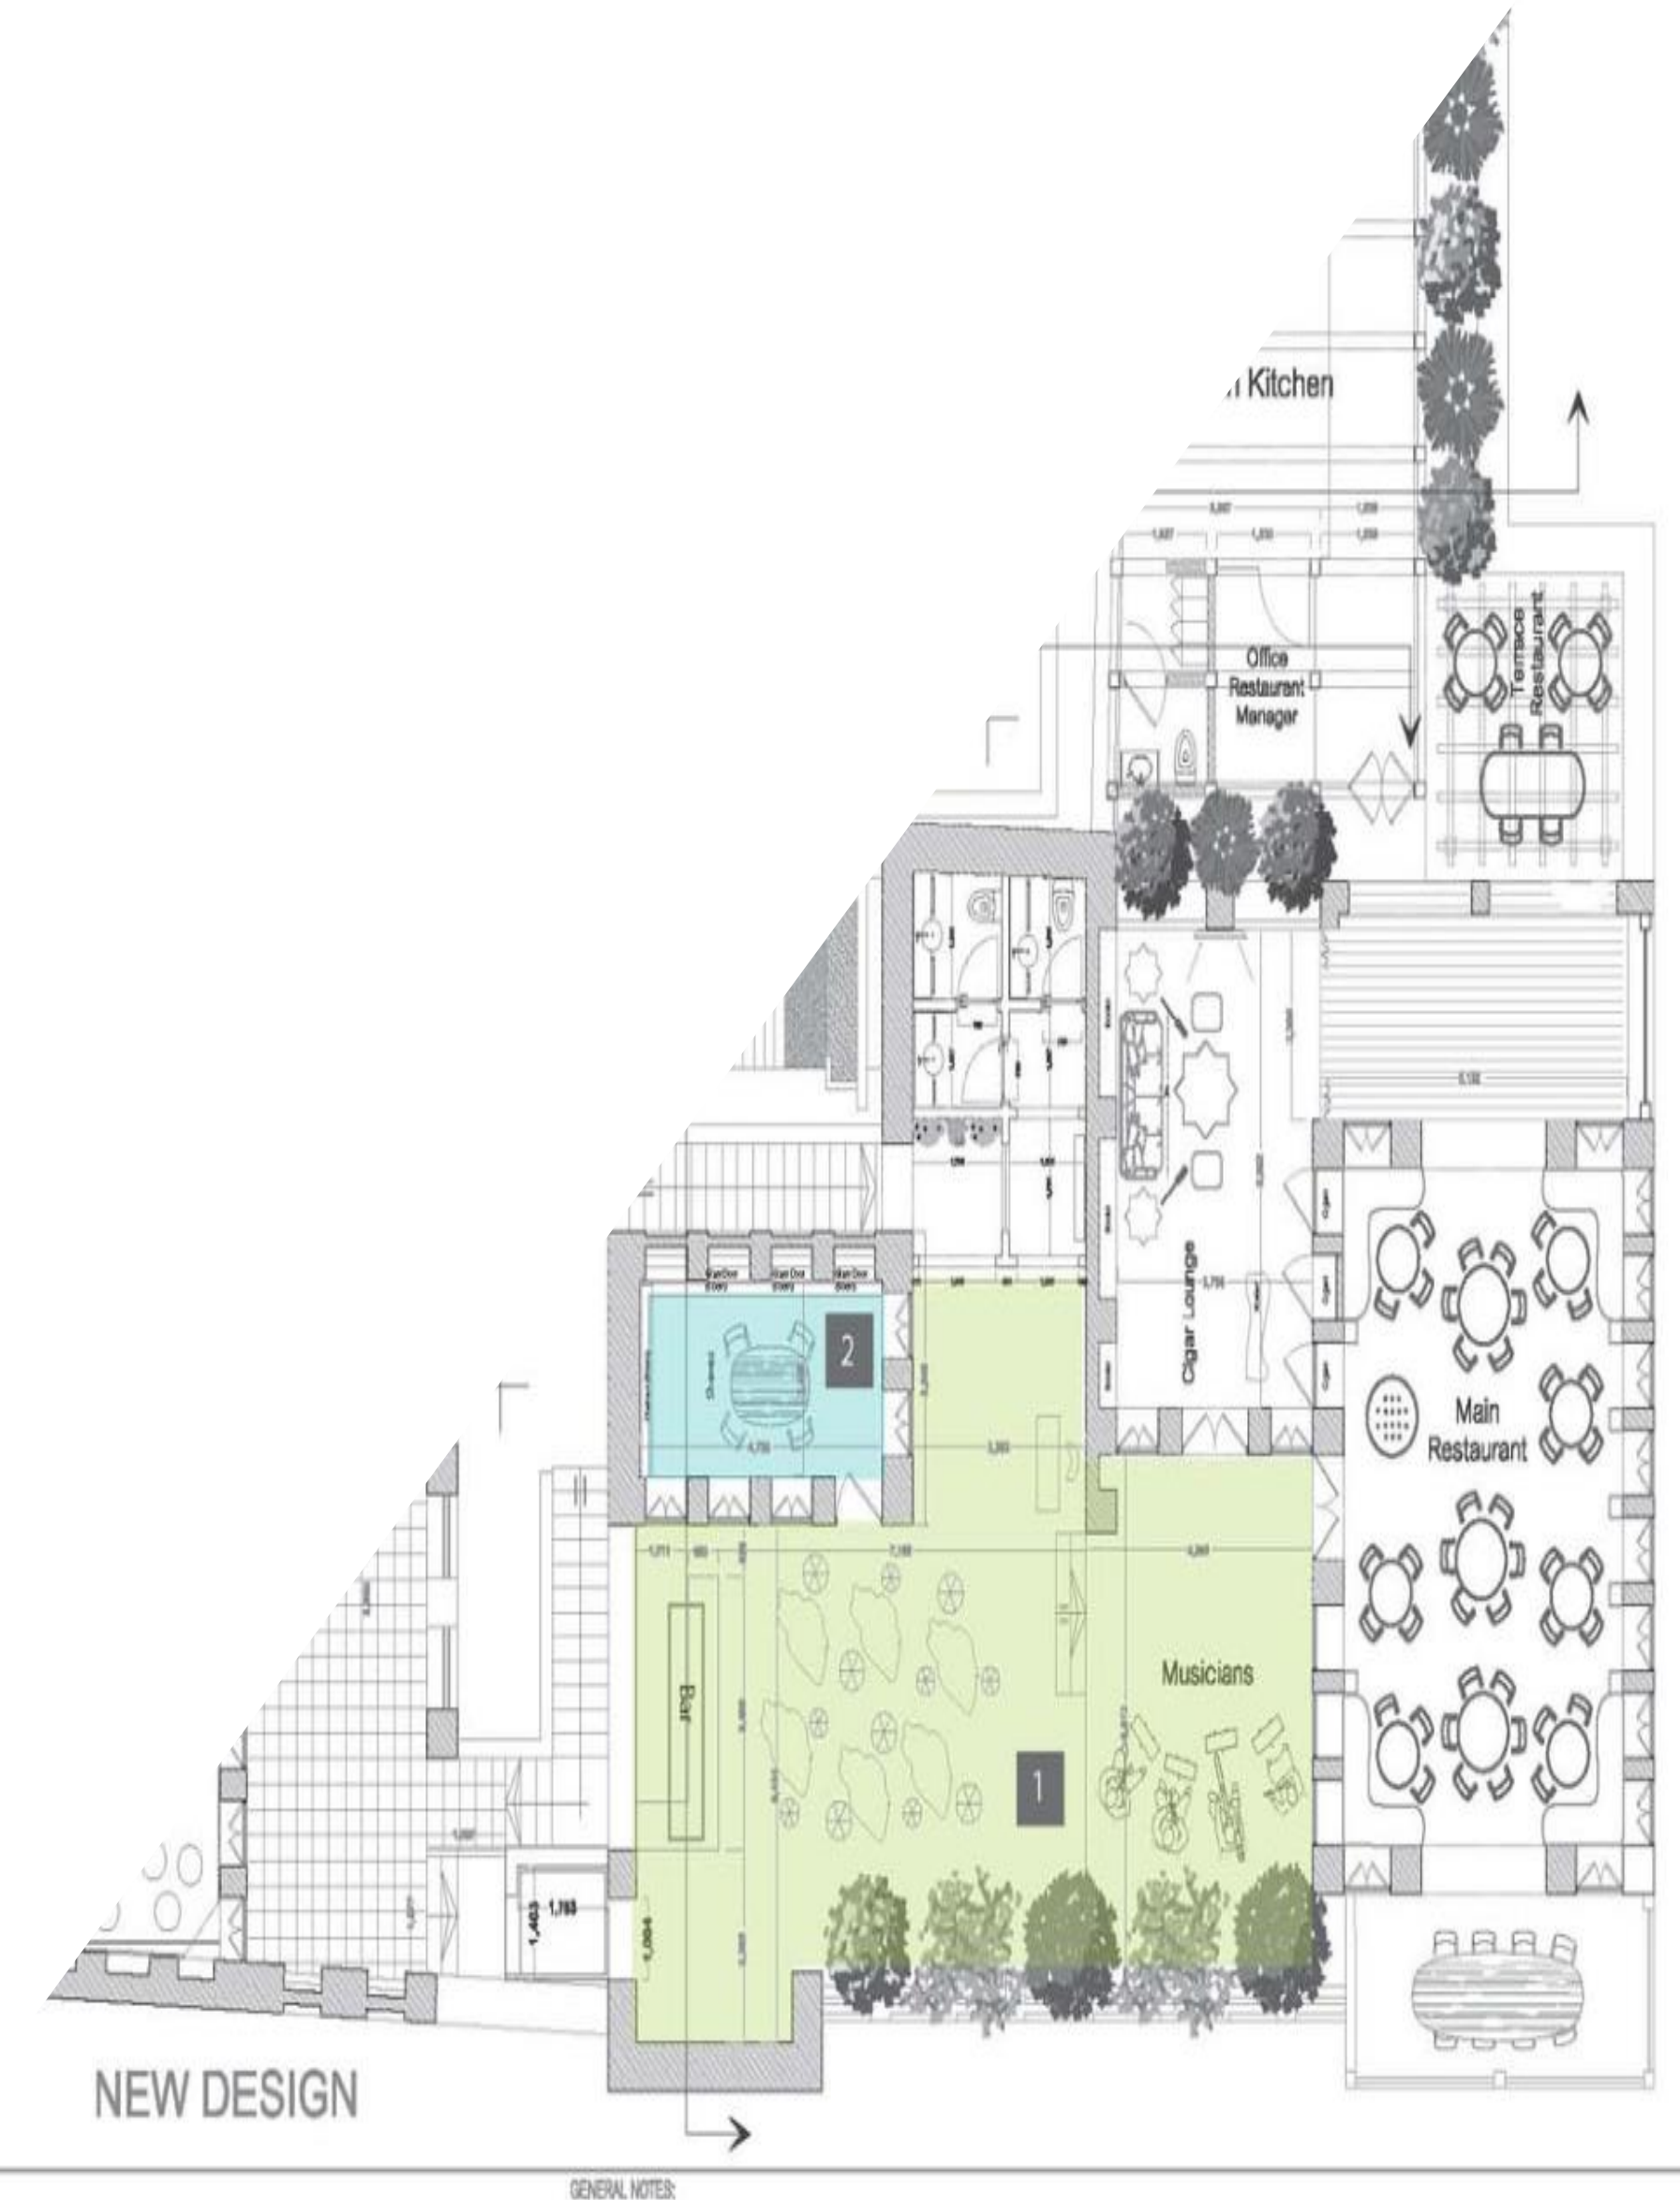

VG comprises wealth of proficiency and experience in Architecture Engineering, Civil Engineering, 3D rendering, and CAD services to give perfect solutions that combine skills, functionality and cost. We are one of the few who understand the quality and delivery requirements of our domestic and international customers.

Our team of Architecture and Civil engineers proposes an integrated approach towards the ever increasing need for concrete and reliable project delivery systems. Vertex Group consists of multiple departments to help our clients retain a competitive edge in their respective markets.

Outsourcing and achievement

Our achievements in field embody the fine experience of our team providing several professional services. The projects we have worked on so far are located in various countries: Lebanon, Qatar, KSA...etc. Each of our projects is original in its own way to fit in the different cultural identity of each country. The architects and planners at VG work hand in hand with other engineering disciplines to offer the coherent services that ensure meeting clients and end-users requirements.

Departments

1

VERTEX ARCHITECTURE

Responsible for design challenges in architectural and structural field

3

VERTEX DRAFT

Responsible for generating all details CAD drawings, draft and shop drawings

2

VERTEX CONSTRUCTION

Responsible for working in the field of construction and public works

4

VERTEX INTERIOR

Responsible for developing interior design solutions

01 ARCHITECTURAL DESIGN

Our architecture design division is dedicated to create innovative, effective, and cost effective solutions for design challenges. We provide architectural design services like predesign, schematic design, design development, architectural drafting, plans, elevation and sections...

02 STRUCTURAL DESIGN

We support entire part of structural design process. Our structural design includes structural steel design, reinforced concrete design and any other design requirements made by client.

03 DETAIL SHOP DRAWING

Architectural Shop Drawing:

We can generate CAD drawings including architectural details for construction projects such as general layout, plan, elevation, sections, door & window details, floor framing plan, roof framing plan, building section, wall sections, roof sections, kitchen details, toilet details & inverted ceiling plans.

Structural and Construction Shop Drawing:

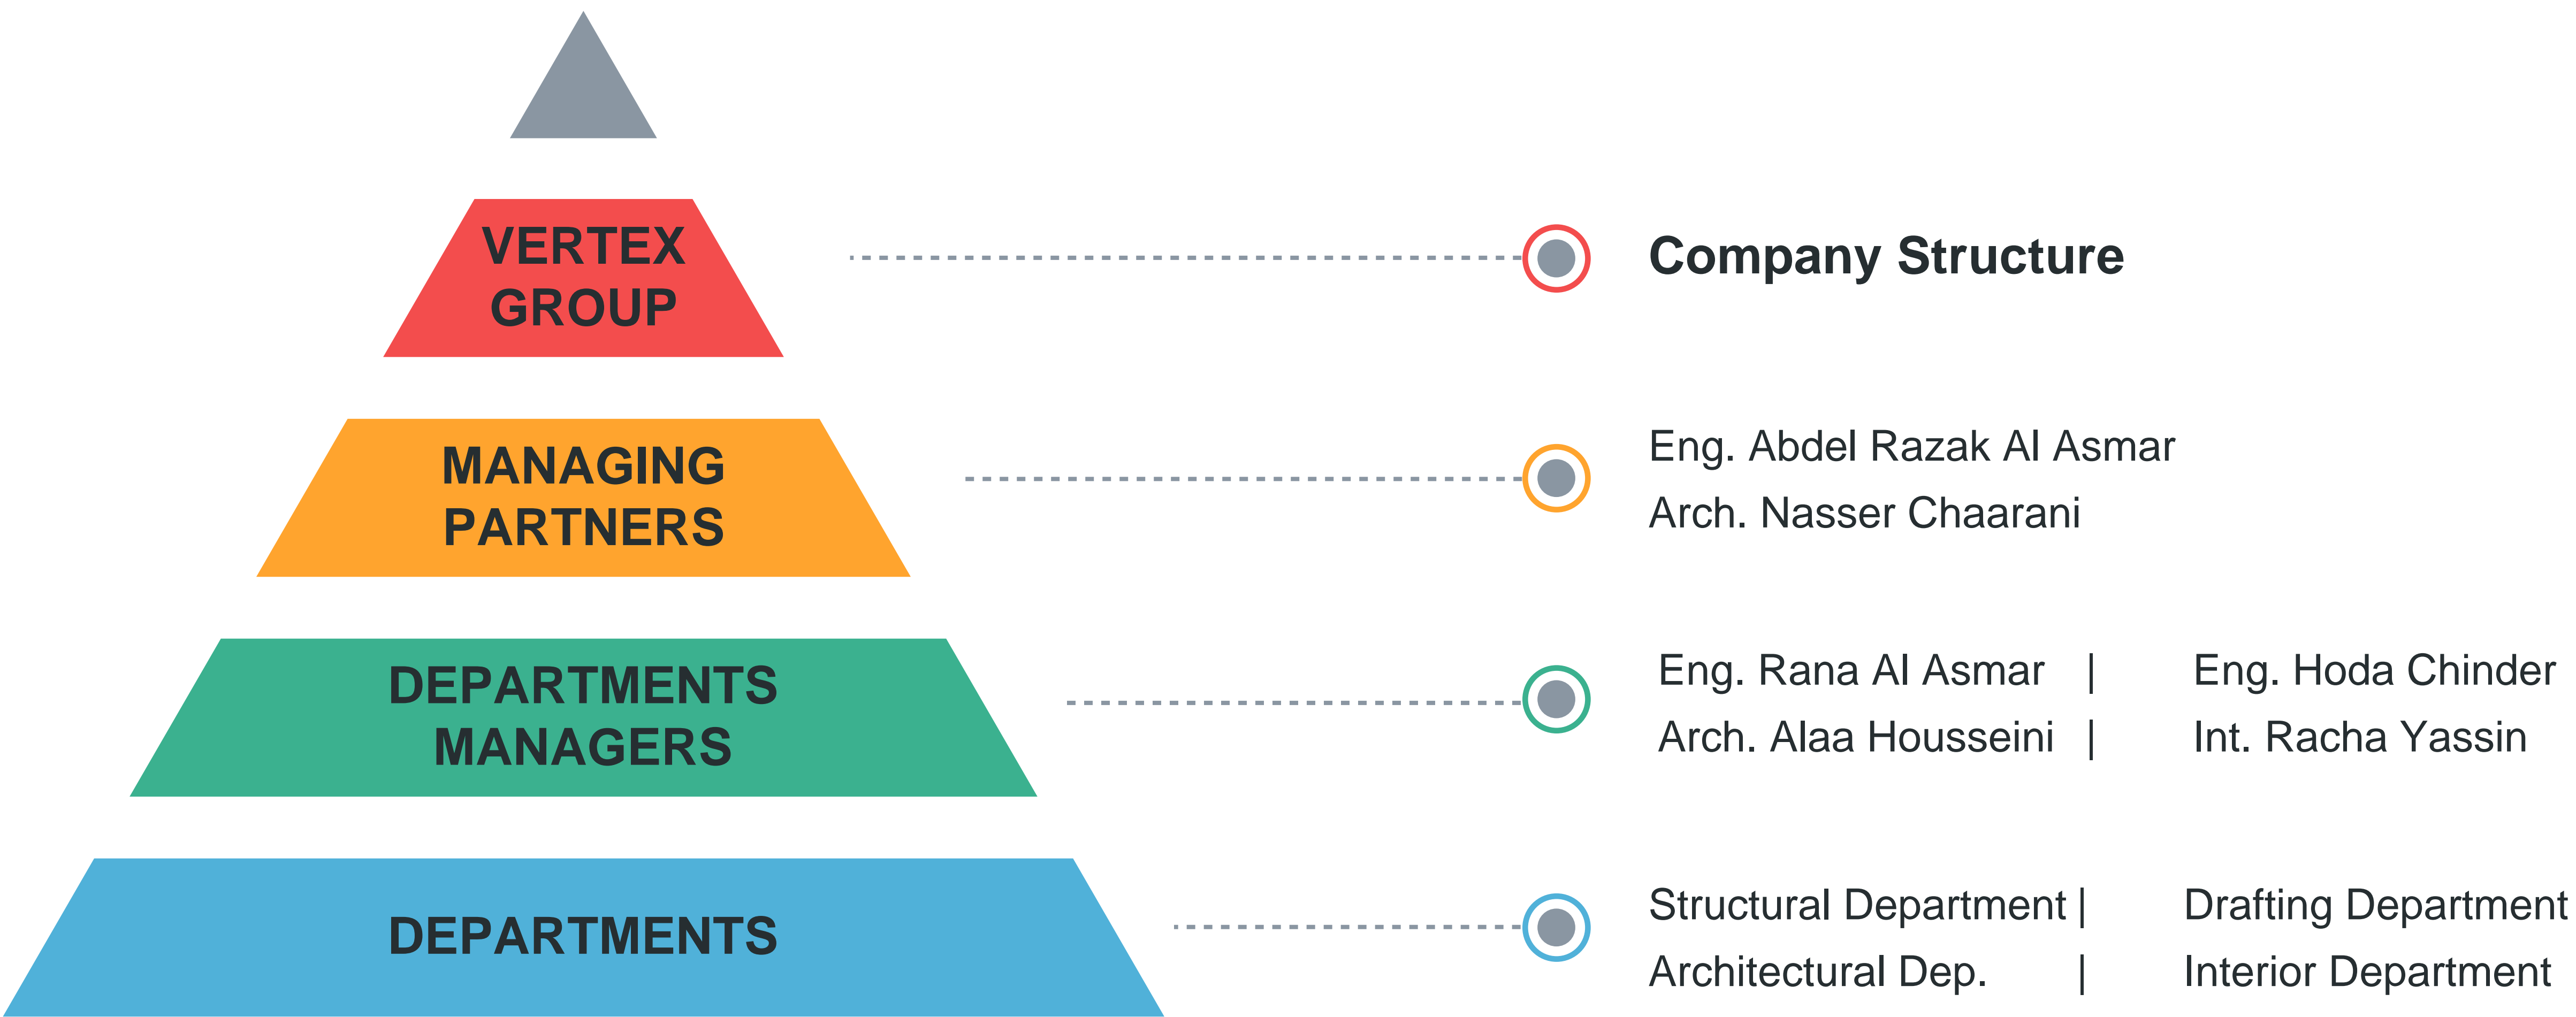

We provide a set of structural drawings that include foundation plans, framing plans and details, wall sections, column and beam details, as well as sections, details, and schedules necessary to describe the structural components of the building structure.

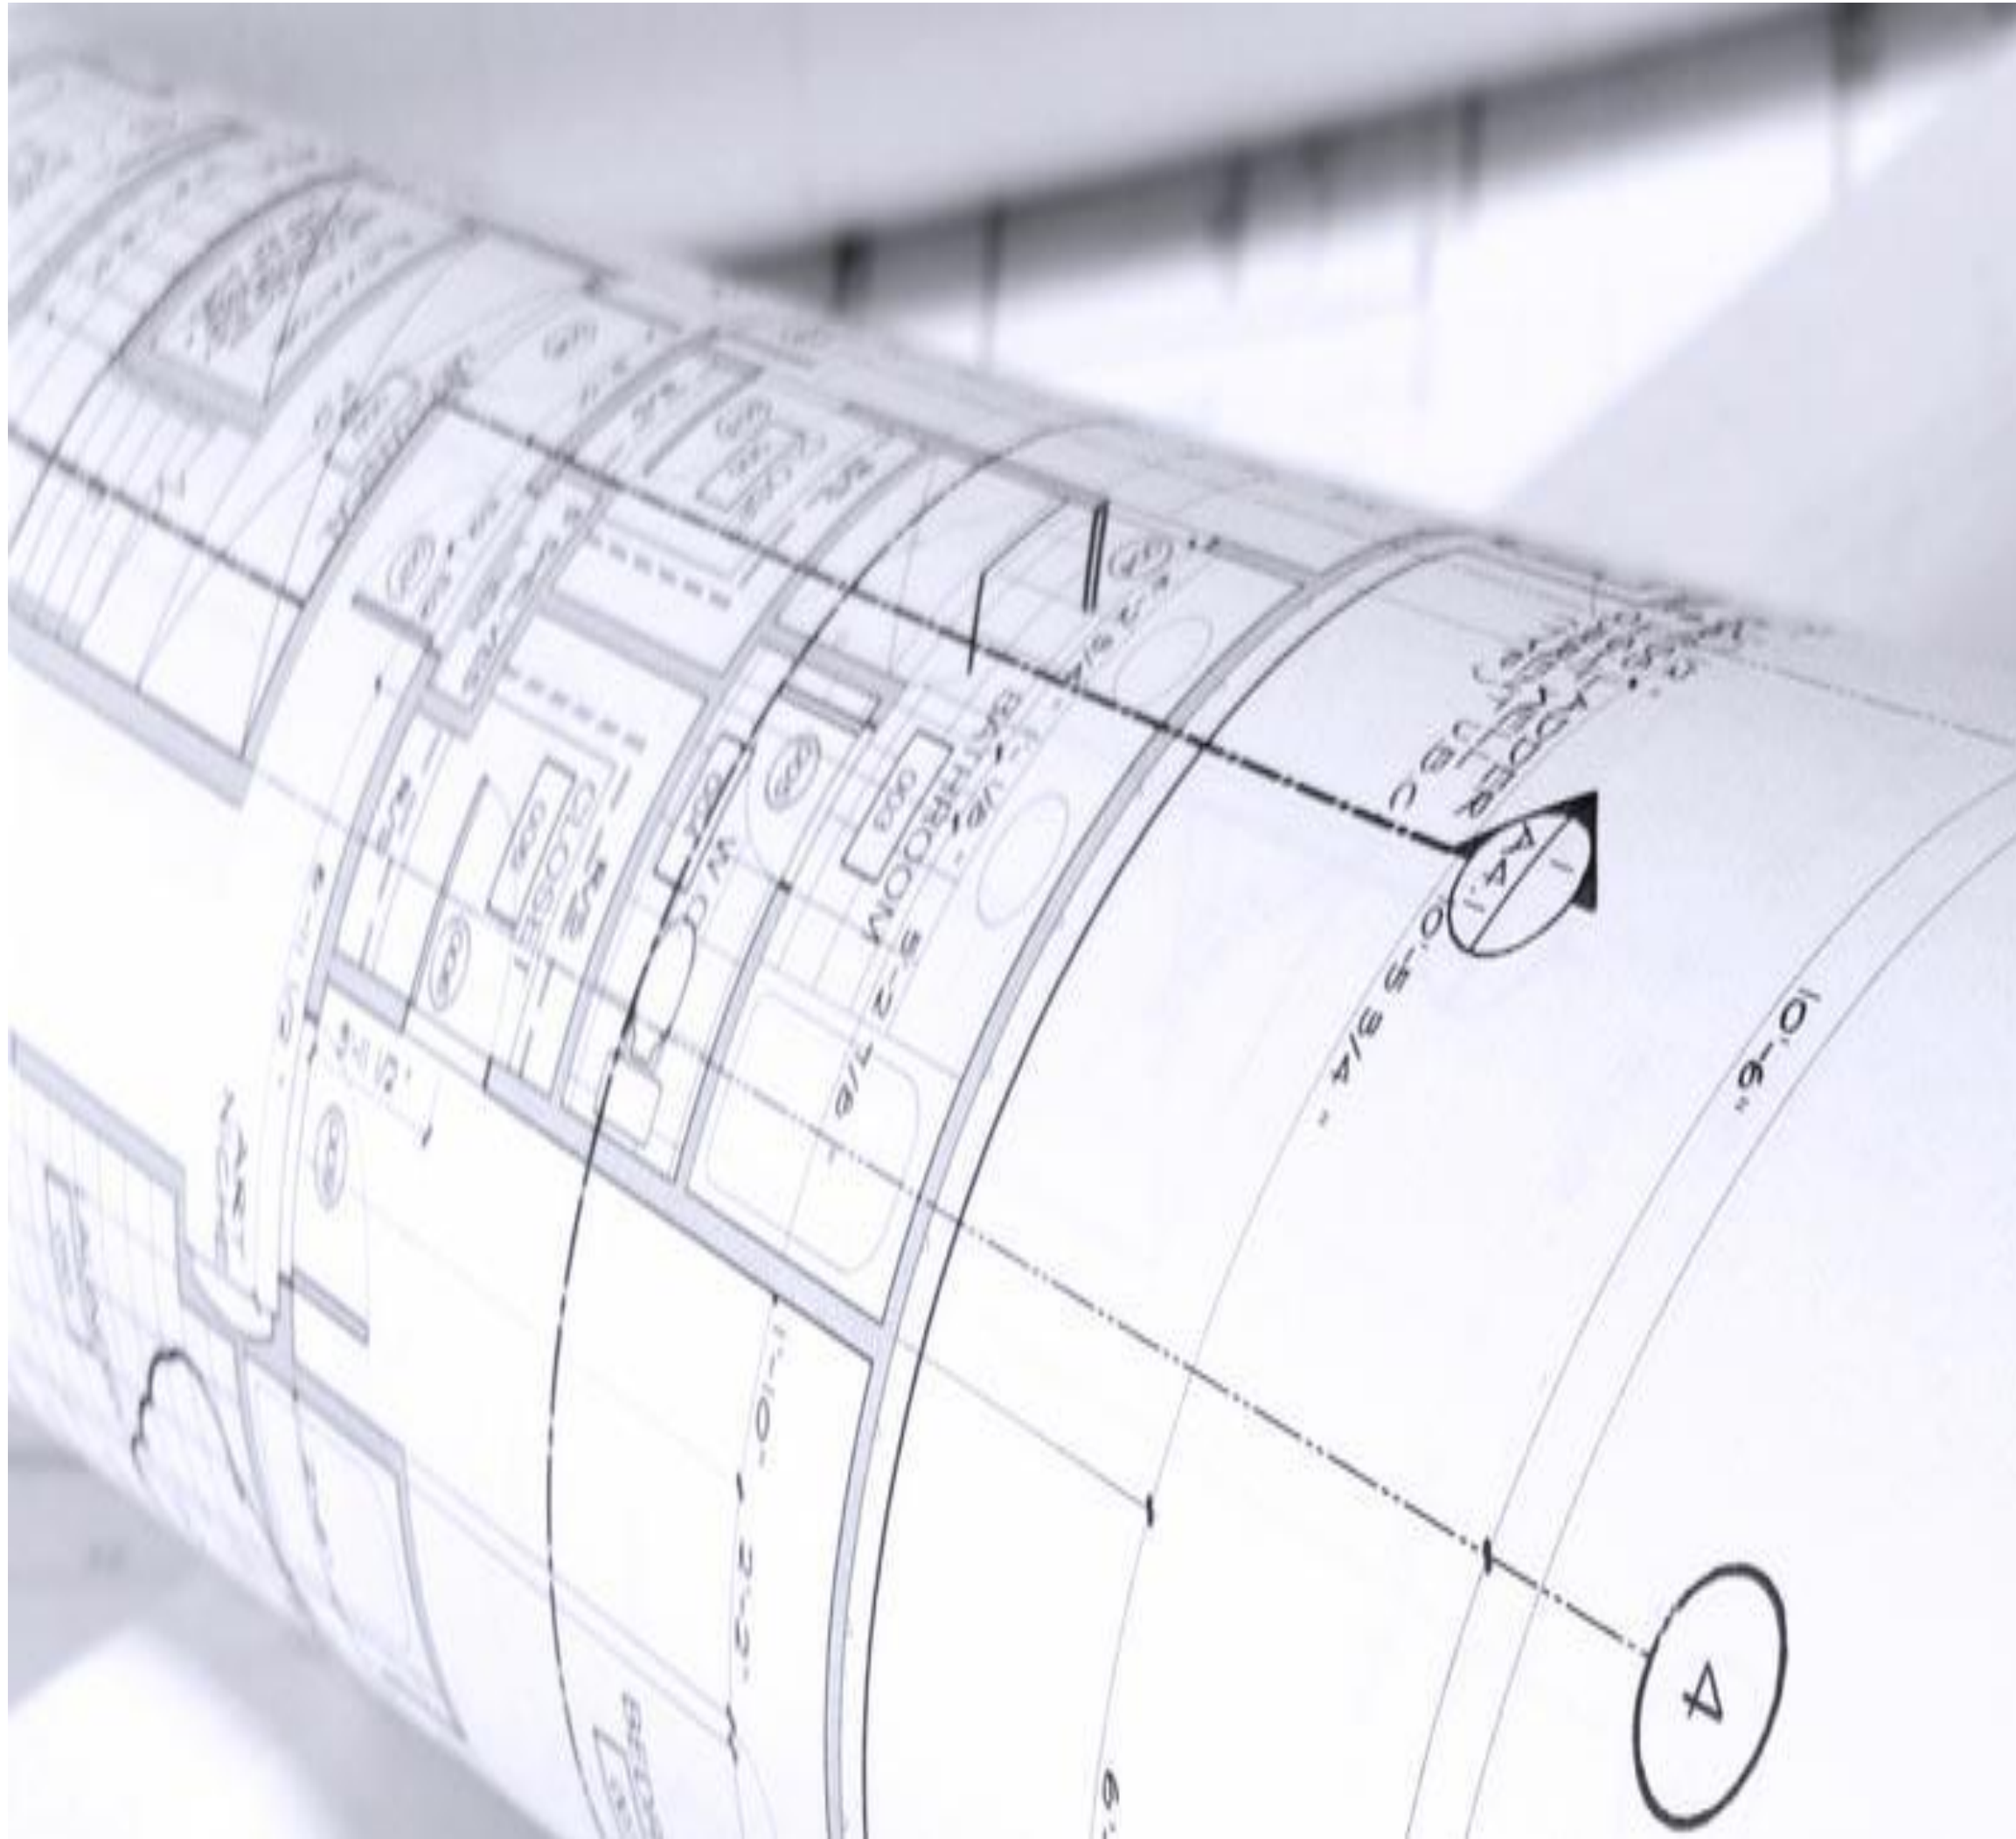

04 RENDERING & ANIMATION

We provide photorealistic models by rendering the design to the best possible quality, using our extensive experience with lighting and texture mapping. We can also integrate the proposed project into the existing site, giving it a realistic sense. A variety of camera angles can be used to profile front, rear or aerial views.
